

# *Angelus Britannicus:*

A N

## EPHEMERIS

For the Year of our Redemption, 1691.

Being the third after the *Bissexile* or *Leap-Year*.

	[	The Creation of the World,	5640	]
	[	The Death of our Saviour,	1658	]
	[	The Conquest of this Nation,	625	]
	[	The Restauration of K. C. II.	31	]
Since	{	The Last great Plague,	26	} Yea.
		The Burning of London,	25	
		The Last great Frost,	7	
		The Death of K. Charles II.	6	
		The Abdication of K. James II.	2	

Amplified with Observations

From the Suns Ingress into the Equinoctial Sign *ARIES*, and the other Cardinal Points; with an Account of the Eclipses, Conjunctions of the Planets, and other Configurations of the Cœlestial Bodies.

Calculated for the Meridian of the famous City of *London*, where the Pole Arctick is Elevated above the Horizon 51 Degr. 32 Min. but may indifferently serve for *ENGLAND*, *SCOTLAND*, and *IRELAND*.

By John Tanner, *Student in Physick and Astrology*.  
The Thirty Fifth Impression.

*Agunt, Non Cogunt.*

LONDON, Printed by W. H. for the Company of Stationers, 1691.

A Table of the exact time of the moon's coming to the South for every day of the first six months of the Year 1691. serving to find out more exactly the time of high water in most of the eminent Ports in England, Scotland and Ireland, and other Ports adjacent.

January hath xxxi days.

A Jove principium, was a heathen saw,  
But let us Christians implore God's Grace,  
To guide us that we not transgress his Law,  
But in our troubles let us seek his Face;  
And he'll remove his rod, and ease our Pain.  
And turn all our afflictions to our Gain.

# January 1691.

Month  
Days.

What though Heavens influence do Mortals threat  
With an unwholsome and contagious air,  
The most benevolent doth England treat,  
As if Heaven had of us a special care :  
And can divert or alleviate at least,  
That mortal Plague that threatens Man and Beast.

## Lunations and other Observations.

# February hath xxviii. days.

The high'st o'th' seven, envious and malecontent,  
Arm'd with the poison of the Scorpion's Tail,  
A Cataline to humane Temperament,  
Doth with Dire influence the world assail,  
Into mens minds infuse a diuillish rage,  
And madness scarcely match't in any age,

# February 1691.

Month Days.

To what the thoughtfull Saturn close design'd  
The rash and wrathfull Star gives fire and flame,  
Their Natures contrary are closely joyn'd,  
Both inimical unto humane frame.

Like fire and water meeting disagree,  
Break through the bonds of Natures Harmony.

Conjunctions and other Observations.

# March 1691.

Month days.

At the Months end they bluster, winds are high  
And boisterous with a disturbed Air,  
The friendly Stars doe sometimes clear the Sky,  
And contribute to make the weather fair.  
And Ceres with their influences bless,  
And cloath her with a comely verdant dress.

April 1691.

Month  
Days

The motion of the nimble Mercury,  
And his Aspects to the superior train,  
Doth oft spread Clouds that darkeneth the Sky,  
Yet some complaints there is for want of Rain.  
The weathers coasting at the latter end,  
The well fill'd Clouds the Farmer doth befriend.

May 1691.

Month days.

Sol's Lustre hid by day by Saturn fly,  
Both wanderers and fixed too by night,  
Behind the Clouds that darken do the Sky,  
And seem to rob Dame Flora of her Right:  
But milder Influences at the last,  
Do make amends for Saturn's churlish Blast.

# August 1691.

Month Days.

The various Aspects of this Month declare,  
A sickle Season makes the Farmer fear,  
Oft changing and a much disturbed Air,  
Now cloudy, on a suddain hot and clear.

At the Month's end you'll find, their fiery Beams  
will clear the Air by violent Extreame.

# September 1691.

Month Days.

*Th' erratick pleasant Influences bring  
Forth latter Harvest, seasonable Weather,  
Their Rays do fructifie the latter Spring,  
And joys the forward Seeds-man altogether.  
Whilst we the Fruits of H. avens All-bounteous hand  
Enjoy: let's not our own Mercies withstand.*

A Table of the Four Terms, and their Returns, for  
the Year, 1691.

*Hilary Term begins January 13. and ends February 12.*  
and hath four Returns.

*Oftab. Hil. January 21. } Craft. Purificat. February 3.*  
*Quind. Hil. January 28. } } Oftab. Purif. February 10.*

*Easter Term begins April 29. ends May 28.*  
and hath five Returns.

*Quind. Pasch. April 27. } (Quinque Pasch. May 18.*  
*Tres Pasch. May 4. } } Craft. Ascens. May 22.*  
*Mens. Pasch. May 11. } }*

*Trinity Term begins June 12. ends July 1.*  
and hath four Returns.

*Craft. Trin. June 8. } { Quind. Trin. June 22.*  
*Oftab. Trin. June 15. } } Tres Trin. June 29.*

*Michaelmas Term begins October 23. ends November 18.*  
and hath six Returns.

*Tres Mich. October 20. } { Craft. Mart. Novemb. 12.*  
*Mens. Mich. October 27. } } Oftab. Mart. Novemb. 19.*  
*Craft. Anim. November 3. } } Quind. Mart. Novemb. 26.*

*Note, That the first and last days of every Term, are  
the first and last days of Appearance.*

*Note, That the Exchequer opens eight days before  
any Term, except Trinity Term, before which it opens  
only four days.*

*Times prohibited for Marriage,*

From { Advent Sunday } { Hilary, Feb. 13.  
Sepruagesima } till { Low Sunday,  
Rogat. Sunday } { Trinity Sunday.

*Conjugium Adventus prohibet, Hilariq; remittit :*  
*Sepruagena vetat, sed Pascha octava relaxat ;*  
*Rogamen vititat, concedit Trina potestas.*

The glorious Planet *Venus* becomes our Morning-star  
from January 22. this present Year, till November 5.  
from thence to the End of the Year she is our  
Evening-star.

# The Table of PORTS.

H. M.

Queenborough, Southampton, Portsmouth, Isle of Wight.	00	00
Rochester, Malden, Aberd. Redland, West-end of the Nore.	00	45
Gravesend, Downs, Rumney, Silly, Blackness,	01	30
Dundee, St. Andrews; Lisbon, Bell-Isle, Holy Isle.	02	15
London, Tinnmouth, Hartlepool, Whitebay, Amsterdam.	03	00
Berwick, Flamborough-head, Bridlington bay,	03	45
Severn, Leith, Dunbar, Kingsale, Callice Creek.	04	30
Newcastle, Humber; Falmouth, Dartmouth, Lizard.	05	15
Plimouth, Weymouth, Hull, Lynn, Lundy, Holmes	06	00
Bristol, Foulness, at the Start.	06	45
Milford, Bridgwater, Lands-end, Waterford, Texel.	07	30
Portland, Peter-port, Harflew, Hague, Dublin.	08	15
Pool, Catness, Orkney, Isle of Man, Bass Island.	09	00
Needles, Lasso, North and South Foreland.	09	45
Yarmouth, Dover, Harwich, Callice Road, Bullei.	10	30
Rye, Winchelsea, Goree, Thames, Rhodes.	11	15

By the help of this Table, and the  $\Psi$ 's Southing, you may find the time of High-water in any of the Ports specified in this Table, by adding the hours and minutes against the Port, to the hours and minutes of the  $\Psi$ 's Southing; the aggregate or sum is the hour and minute of the time of High-water at that Port, subtracting 12 if your number exceeds it. Having so often explained the use of this Table, I hope it needs no further Explanation.

When the  $\Psi$  shines so bright, as to cast a shadow on the Sundial; see where the shadow falls, count how many hours and minutes it wants of 12, and subtract that from the time of her Southing that Night, and the remainder is the hour of the Night; If the shadow be upon any of the hours past 12. add it to the time of the  $\Psi$ 's Southing, and that is the hour of the Night, subtracting 12. if the number exceed it. If the shadow be on the Line of 12. the hour and minutes of the Southing is the time of the Night. I have so often explained each Page and Columne of the Almanack, that I need not do it here again.

Througb

Astrological Observations for the Year 1691.

Through Mars's Flames, and Saturn's poy'snous Steams,  
From th' loathsome Scorpions influence extreame;  
Through open Rage, and secret Treacheries  
Of foreign Foes, and homebred Enemies.  
By the good guidance of God's gracious Hand,  
And the wise Conduct of our Hostile-band.  
By William good and great, our Gracious King,  
Whose Fame now through the Universe doth ring:  
And Mary our most Gracious Queen, whose Fame  
Doth eccho to each sound of William's Name.  
Whilst ke the Monsters cut off in a trice,  
She broke the Eggs o'th' Hatching Cockatrice.  
By Their joyn'd Counsels, Courage too, are we  
From deep-plung'd Slaves, rais'd up to Liberty.  
Let's first lament our Sins, implore our God,  
For his great Names sake, to remove his Rod.  
With chearful Hearts, open and liberal Hands.  
Let us obey Their Majesties Commands.

Proud Lewis, then be gone from off our Coast;

William and Mary, they shall rule the Coast.

*Of the Winter Quarter.*

**T**HIS Quarter commenceth with the ☉'s entrance into the first Minute of  $\text{VS}$ , at which time, we the Northern Inhabitants of this Earthly Globe, receive the least Portion of the Sun's Rays and Light, making our shortest Day, and long-st Night. It happeneth this year on *Thursday* the 11th day of *December*, at 35 min past 7 in the Morning, at which time 25 deg. and 22 min. of  $\text{♊}$ , is upon the Midheaven, and 21 deg. and 31 min. of  $\text{♋}$ , upon the Horoscope. About this time great Consults are on foot, and a strict enquiry into Mens former Actions, that have been entrusted with the Affairs and Treasures of the Kingdom, *Curat lex & fiat justitia*; and let the rigour of the Law take place upon such as would betray the King, Kingdom, and the Protestant Religion into the Hands of Tyrants, and bloody Prosecutors.

The Influence of the Conjunction of the two Malevolents, ♄ and ♀, are likely to shew the World, that the many and great Troubles, Vexations, and Miseries, that most Kingdoms and States in the World labour under, are not as yet over, which had their rise from the Influence of ♄ and ♀; the Malevolence of whose Opposition will shortly manifest its self; and this malevolent Conjunction of the two Infortunes, together with their Quartile and Opposition, will usher it in with a Vengeance. That famous *Italian Spinaeus* saith, *Every immoderate Constitution of the Stars, bring Death among old and infirm People; but to others, violent Effects, cruel and utter Ruin.* Let the *Turk* lament their former losses, and will have more to lament, if they make not a Peace with the Emperor. Poor *Ireland* may lament her late Miseries: and if her Wars be over, or near before this time, (as it is hoped it is) yet is she not free from the evil Portents of this Conjunction; perhaps some malignant Distemper may afflict her Inhabitants, aggravating her other former Sorrows and Afflictions she hath lately groaned under, and is still sensible of.

All *Europe* in Arms, both Earth and Sea disquieted and enraged, and so are the minds of Men. Oh! Inhabitants of *England* be you content, praise the Lord for those great and eminent Deliverances and Mercies he hath vouchsafed to bestow on you; and for what you are likely more to enjoy, if you fly not from your Mercies by Murmuring and ungrateful Repinings against God and his Instruments. This Conjunction signifieth a great intemperature in the Air, much Wet, many Floods; great Distempers in Mens Bodies, and great Disorders in the World, as Wars, Bloodsheds, Battles at Land and Sea, in several Places of the World, and Seasons suitable to such Actions; many Treasons, Treacheries, and underhand and deceitful Dealings practised among Men, and sometimes under the shew and colour of Religion, not only among the vulgar or common sort

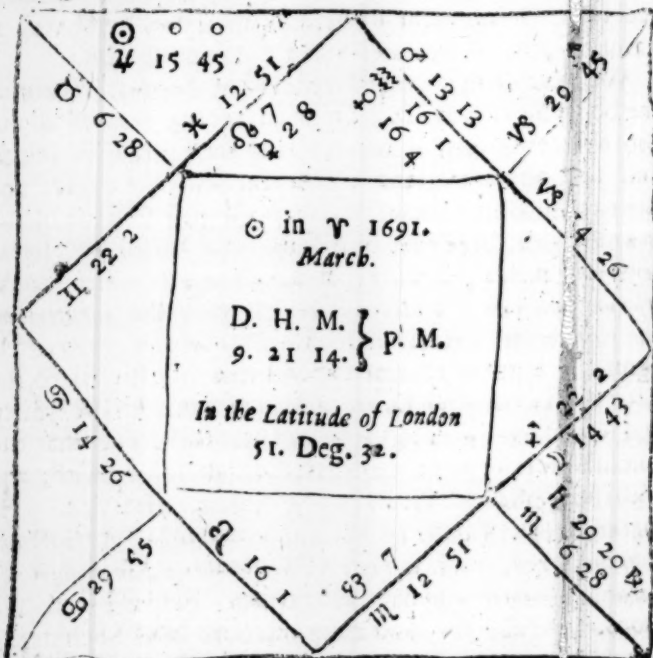

sort of People, but against the Government also. For  $\text{h}$  is  $\text{h}$  still, and he is placed in  $\text{m}$  still, that treacheous Sign. And if you please to look back into my last years *Ephemeris*, you may see what a *Character* I gave him as posited, and how exactly he, or rather those Persons signified by him, made good their *Character*; and will not be wanting to shew themselves the same this year also, if Their Majesties carry not a stricter Hand over them, &c.

Seldom hath this Conjunction happened, but there hath happened turbulent Weather, even to extremity. In the year 1542. *August 5.* violent Tempests and Shipwracks, the Conjunction was in  $\text{m}$ , and the Effects happened at 22 degrees distant. *August 12.* Tuffon, with Wind and Rain seeming more than natural, they were 25 degrees distant. *March 13.* Snow for four days together, they were distant 10 degrees. *June 14.* at Buda a horrible Tempest, and the Top of St. Stephen's Church suffered by it, the Planets were then in  $\text{m}$  also, and 2 degrees distant. 1602. *September 20.* there was a Conjunction in the latter part of  $\text{m}$ , a terrible Tempest followed; the like followed several times in *October* following. Many Examples of the like Nature might be produced, whenever  $\text{h}$  and  $\text{f}$  are so joyned, or in Opposition, and at the distance of sometimes 10 degrees, sometimes 18. sometimes 20, and sometimes at 30 degrees distance. You will find frequent fits of the Weather, a constant churlish, sometimes a savage Constitution, saith the Learned Dr. Goad, a strict observer of heavenly Influences. There may be Instances produced of Inundations, Comets, Earthquakes, Pestilences, and many such like Events under such a Configuration. The Sweating Sickness, 1485. the first year of King Henry the Seventh. was ushered in with such a Conjunction in *Scorpio*, which swept away many People.

*Astrological Observations, 1691.*

*Of the Spring Quarter.*

**T**HIS Quarter begins when the *Sun* enters the first point of the Equinoctial Sign *Aries*, making our Days and Nights of equal Length. It happeneth this year on *Tuesday* the 10th of *March*, at 14 min. past 9 in the Morning, according to the vulgar Computation; but *Astronomically* on the 9th of *March*, at 21 h. and 14 min. past Noon. At which time 22 deg. and 2 min. of *Gemini* ascends the Horizon, and 16 deg. and 1 min. of *Aquary* upon the Mid heaven, the Figure followeth.

The *Sun* and *Jupiter* in the Eleventh, *Mars*, *Venus*, and *Mercury* in the Tenth. Above the Earth we may be positive they are; but for the reasons I gave you in my last years *Ephemeris*, I shall not presume to tell you precisely

in what Houses, or part of Heaven they are in, as to give a Judgment therefrom, there being so great a difference in Astronomical Computations. Let it suffice therefore, that they are all above the Earth, except  $\hbar$  and  $\gg$ . Whence there is an Indication, that Affairs are more open and conspicuous than heretofore; and the secret Machinations, and close Conspiracies of the Enemies to our Government, now laid more open to the World. And the active Contrivers, and Abettors of our late Mischiefs and Misfortunes, and ungrateful Rebels, before this time (we hope) have received, or know the Reward of their evil Practices, against so just, and so merciful a King and Queen.

We have  $\gamma$  in  $\nu$ , the Ascendant of *England*, receiving the benevolent Rays of  $\sigma$ ,  $\rho$ , and the  $\gg$ ; as if all our Storms were over, or near it; and that Serenity, Peace, and Tranquillity attended the Kingdom of *England*, and the careful Government thereof. Of this Position of  $\gamma$ , *Bonius* saith, *Significat multitudinem substantiarum, civibus regionum quibus præsuerit, & bonitatem esse eorum, atque ipsorum gaudium, & alacritatem, & dilectionem popularium, seu rusticorum, erga divites, & nobiles atque magnates.* It signifieth a great increase of Wealth and Riches to the Cities and Countries under *Aries*; it signifieth Prosperity and Goodness to them, Joy and Gladness, and that the common sort of People shall be much delighted with, and chearfully obey the Gentry, Nobility, and Grandees. He further saith, *Jupiter est significator Nobilium, & Judicum, & Episcoporum, ac consulum, & Religiosorum, ac civium Sæcularum.* *Jupiter* signifieth Noblemen, Judges, and Bishops, Consuls, the most religious Sort, and Societies in Cities.

Soon after the Vernal Ingress, the two Malevolents,  $\hbar$  and  $\sigma$  are in a Quartile Aspect, and signifieth many Robberies, Spoilings and Mischiefs, by bold and daring Robbers, Highway-men, and Pirates, many Repinings, Murmuriage,

murings, and false and wicked Aspersions against the Government; hence ariseth in some Parts of the World Disobedience and rebellions against their Superiors.

During the Influence of this Quartile Aspect, expect Landfights, and Slaughters of Men, where Armies are near, or where Towns or Cities are besieged: Where Fleets are at Sea, expect Sea-fights, and bloody Sea-battles, to the Destruction of many. I see no reason to predict any Evil to the Kingdom of *England* in General, but a growing Glory and Advantage by the Evils we have of late suffered: Greatness and Glory to Their *Majesties*, and the Government, notwithstanding the many Treacheries, Treasons, and ambodextrous Dealings of their pretended Friends, and false Ministers. And by this time we shall see a more visible Retrogradation of the *French King's* Affairs. Which God of his Mercy grant for the Ease and Peace of *Christendom*.

*Of the Summer Quarter.*

**T**HIS Quarter commenceth with the ☉s entrance into the Tropick of ☐, when our Terrene Globe hath made her furthest Inclination Southward to the ☊, or the ☉ hath made his greatest Declination to us, and by that means given us the greatest Portion of Day-light, and least of Night, making our longest day 16 hours, and 30 min. and our shortest Night 7 hours, and 30 min. in the Latitude of 52 degrees. It happeneth this year on *Thursday* the 11th of *June*, at 30 min. past 10 before Noon. At which time the Midheaven is occupied with 9 deg. and 26 min. of ♊, or the Coelestial Twins; and 14 deg. and 21 min. of ♋ ascends upon our Eastern Horizon. All the Planets are above the Earth, except ♄, who now (as in the Spring Quarter) sculks under the Earth in the treacherous Sign of ♎. But we hope that his undermining, and Jesuitical Conspiracies, or rather of those whom he signifieth, will be more and more laid open, and discovered, &c. ----- *Venus* is in Opposition to him at the very Ingrefs, and I believe

believe will have a greater Signification, than that which Haly hath assigned, *Quod mulieres habebunt rixas, & placita multa cum viris suis.* The Conjunction of  $\eta$  and  $\varphi$  hath this Character, sudden Showers in Summer, cold, moist, and unfriendly Weather, and we may justly expect such kind of unfriendly weather from the Opposition. For  $\varphi$  is near the *Pleiades*, a turbulent Constellation of the nature of *Mars*, and the  $\gamma$ , and  $\eta$ , facing her from the *Scorpion*; we may probably find it a foul hole, and from their Influence, as likely have foul Weather, a turbulent Air, cold and unfriendly, the Season considered. In the next Month, we have a Conjunction of  $\gamma$  and  $\sigma$ , in the 11th degree of  $\sigma$ . Haly saith, *Quando Mars jungitur cum Jove denotat multas lites, & cruce Signatus, percussiones, Vulnera, & Placita; etiam accidunt morbi Populares & Mortalitates, in climate & terra climatis, in quo jungent, & erunt bestia magni valoris, & diversi colores in aere apparent; in initio quoque illius temporis erit fertilitas, & in fine siccitas; etiam mortem alicujus regis in illo climate, & Revolutione significat.* When  $\sigma$  is joyned with  $\gamma$ , it denotes many Strifes, Quarrels, Wounds, Slaughters, and Mischiefs: there will happen popular and epidemical Diseases, and Mortality in that Climate, and in that Land under the Sign in which they are joyned; and there shall appear strange Sight in the Air, &c. In the beginning also of that Season, there shall be great Fertility, and in the end Drought. It also signifieth, the Death of some King in that Climate, and in that Revolution. In this Month also, is an Opposition of  $\eta$  and  $\sigma$ , which aggravates the evil Portents of the Conjunction, and threatens poor *Ireland*; more especially, if the War be not ended there before this time. What other Places are threatned with these Configuration, I shall make mention before I make an end. This Conjunction hath been, and ought to be heeded with a sober and composed Observation. For they are

of

of the number of Superiors, and in Alliance and League to the higheſt. They viſit us but once in two years, and ſomething conſiderable follow as the Effects, according to the Will of the Creator. Saith Dr. Goad, *There is a certain Law in the Heavens, which none but Aſtronomers Contemplate; none but Aſtrogers make Uſe of.* The firſt look on it as a perplexed Buſineſs; the other a wiſe and powerful Oeconomy. He goeth on with this Queſtion, *But why of all Mathematical Diagrams, ſhould the Celeſtial Scheme be leaſt uſeful?* He, who looks upon Architecture and Fortifications to be only Trangunims, is a wiſe Man, and of great Experience; and he who thinks the Diſtance and Motions of the Planets, with all their Variety, either as to themſelves, or to the reſt, is only Cypher and Dumb-thew, ſhall ſit next to him. So far this Worthy and Learned Man juſtly reprehends the Ridiculous Contemners of *Aſtrology*. But to return to our Aſpect, which is heedfully to be obſerved, oftentimes procuring Weather of a contrary Quality in a day or two, ſometimes in one day; and on the ſame day, as Kepler Records, *Nivoſa, Grando, & Tonitas*. In Summer, it gives all manner of Weather, Dry, Miſt, Clouds, Wind, heat, Rain, Hail, Thunder, and ſometimes with Violence; for they are often violent in their Influences; tho they make a pleaſant Sight in the Firmament when they are together, beautiful as Cannon are in the Camp, tho terrible in their uſe. Of this variety and extremity of Weather, there might be plenty of Examples heaped up, which I muſt omit. And I ſhould exceed my Bounds, if I ſhould produce a tenth of former Examples of Sickneſſes Epidemical, under this Aſpect. If we now eſcape, let us praife our merciful God, who can further or withhold their Influences when he pleaſes, and for his Mercies ſake.-----

We cannot paſs the Opposition of *Saturn* and *Mars* in July, *Significat quod homines in ſe invicem diſcordabunt, & proſequentur*

*prosequuntur se mutuo Odio, & cessabunt se familiariter invisere, & detrahent quilibet alteri, &c.* It signifieth that Men shall be at discord among themselves, and shall maliciously and despitefully prosecute each other, and shall cease from friendly Visits and Correspondence, and shall Slander and Villify each other. *Astrologers* call them the two Infortunes. *Astronomers* amuse the World, when they describe their Magnitude, Distance, and Proportion, one to another, and to the Earth: And they that make a strict Observation of their Influences, may as much wonder at that, as at their Dimensions. They alarm the World with Wars and Bloodshed, viz. in those places where Armies and Fleets are near, and likely to be Engaged. Storms, Tempests, Fiery-Meteors, Sickneses *Epidemical*, Comets, and Earthquakes. It were a Madness for any Body to expect all of these to happen at one time, nor that any of these Effects shall appear in every place. Nor shall the most Critical *Sceptick* be able absolutely to acquit them from the Imputation of some unfortunate, or unavoidable Influence to the Generality, in some kind or other.

*Of the Autumnal Quarter.*

**T**HIS Quarter begins with the *Sun's* entrance into *Libra*, at which time the Earth is at the right Angles with the *Sun*, and receiveth an even Portion of Light and Darkness. It happeneth this year on *Saturday*, the 12th of *September*, at 3 min. past Midnight, at which time 0 degr. 49 min. of *Aries* is upon the Midheaven, and 27 degr. and 15. min. of *Cancer* upon the Horoscope. All the Planets under the Earth, except *Jupiter* and *Mars*. I might have taken Notice of the Opposition, Platick of ♄ and ♀. ♄ in III. ♀ in VIII. it is a *Transgrand Aspect*, and hath been attended with suitable Effects. There was an Opposition in the same Signs in the year 1513. in *June* a great Pestilence and Mortality happened in *England*, and especially

in London. Such an Opposition happened in the year 1573. in the Fifteenth year of Queen Elizabeth (the famous Earthquake at Kinnaston in Herefordshire, preceded this, viz. 1671. &c.) Upon this Opposition in 1673. many Remarks happened, viz: the Duke of Northumberland arraigned, condemned, and executed for Treason. The Comet in Cassiopea's Chair. The bloody and unparallel'd Massacre of the Protestants in France. Many Tumults, Rebellions and Revoltings in Ireland; a very hard Winter. Altho the Opposition is not *Partil*, yet it cannot pass without considerable Influences. *Haly saith, Quod erunt multe rixos, & placita inter homines, & gentes, unus, animabitur contra alterum, vel inter alios homines, qui sunt inferioris gradus que reges; etiam significat nubes multas.* Many Quarrels and Controversies between Nation and Nation, and they shall be much animated against one another, and this to happen among those of a lower degree than Kings. It signifieth many Clouds, or a moist Season. Whenever we find the Superiors in Conjunction or Opposition, and during their Distances of twenty or thirty Degrees, we may at sometimes, and in some parts, expect Heights and Excesses in the State of the Air, prodigious high Winds, and Hurricanes dark Air, gentle, and long lasting Rain, violent Dashes, deep Snows, Hail of unusual size, Floods, and Inundations, Sickneses, and Mortality. Comets, or unusual Meteors. This Opposition hath Relation to those Kingdoms and Cities, as are likely to suffer from the other Configurations before named, and are as followeth:

Under  $\gamma$ , are Russia, Polonia; Sweedland, Lorrain, Campania, Helvetia, Rhetia, Franconia, Partbia, Persia, Ireland, Cyprus, &c. Cities, Bononia, Mantua, Tarentum, Zurich, Lucern, Nants, Carolstade, Lipsig Novagrade, Panorme in Sicily, &c.

Under  $\alpha$ , are Norway, Upper Bavaria, Comogena, Cappadocia, Idumea, Mauritania, Fess, Cietbulia, Carthonia, &c. Cities,

*Astrological Observations, 1691.*

Cities, *Algeirs, Valentia, Urbine, Pistorium, Camerinum, Forum, Fulium, Messana, Vienna, Alchstade, Gaunt, Frankford upon Oder.*

Under ♄, are *Gallia, Togata, the Alps, Italy, Sicily, Bohemia, Turkey-part, Sabina, Phenicia, Chaldea. Cities, Damascus, Siracusa, Rome, Ravenna, Cremona, Conflueme, Prague, Crimisum.*

Under ♀, are *Amazonia, Samaria, Tartary the Great, Valachia, Muscovia, Sweedland South part, Westphalia, Mosel, Piedmont, Bavaria part, Ethiopia, Oxiana, Media, Arabia Desert, &c. Cities, Hamborough, Breme, Monserrat, Pisarum, Trent, Salisbourgh, Ingolstade.*

*Of the Eclipses this Year.*

**I**N this year 1691. will be two Eclipses of the ☉, but none of the ☾. The first of the ☉ will happen on February the 18th, about Six in the Morning. but will not be seen of us, because the ☉ then is under the Earth.

The second is an Eclipse of the ☾, on the 13th of *August* about Six; and tho the ☾ be above the Earth, yet he will not appear Eclipsed unto us, because the visible Latitude of the ☾, by reason of her great *Parallax*, will exceed the Sum of the Semidiameters of the Luminaries.

*And now my weary Pen must make an end,  
And bid a farewell to each Loyal Friend,  
Who serve Their Majesties with a true Zeal,  
And therein Friends are to the Common-weal.  
From such as would the Nation betray  
To French or Turk, let us for ever pray,  
Good Lord deliver us; and may their fate  
To be Anathema'd in Church and State:*

*May Princes Courts and Counsels from such Men  
Be ever free: let's ever say, Amen.*

*Amersham, Bucks,*

**FINIS.**

## ADVERTISEMENT.

**C**ursus Mathematicus. *Mathematical Sciences in Nine Books. Treating of Arithmetick, Geometry, Cosmography, Astronomy, Navigation, Trigonometry, with the Description, Construction, and use of Geometrical and Natural Instruments. And the Doctrine of Triangles applied to Practice in Mensurations of all kinds, as in taking of Heights, Distances, &c. Surveying of Land, Woods, Roads, &c. Fortifications, and in Navigation, and Dialling. All which are disposed in such Method and Order, as they ought to be Read and Practiced by such as would attain to a competent Proficiency in them, by their own Industry.* By William Leybourn, Philo Math. Folio. Printed for Thomas Bassett, Benjamin Tooke, Thomas Sawbridge, and Awnsham Churchill.

**Dioptrica Nova.** *A Treatise of Dioptricks in Two Parts. Wherein the Various Effects and Appearances of Spherical Glasses, both Convex and Concave, Single and Combin'd, in Telescopes and Microscopes; Together with their usefulness in many concerns of Human Life, are explained.* By William Molyneux of Dublin, Esq; Fellow of the Royal Society, Quarto. Printed for Benjamin Tooke.

**B**ateman's Spirits of Scurvey-Grass, famous for the Cure of the Scurvy, Gout, Dropsy, and most other Chronical Diseases, continued to be truly prepared, and sold at the House where Mr. Bateman dwelt in Paul's Chain near Doctors Commons, by the Persons to whom he only entrusted that Secret. Sealed as formerly, with the Half-Moon and Ermins, to prevent Counterfeits. Price 1 s. each Bottle.
